

# Aleksei Lobanov

## Flutter Mobile Engineer (Android)

Novi Sad, Serbia · Remote · lobanov.aw@gmail.com · alobanov.github.io/cv-ead106acf1

### PROFILE

Flutter engineer with 15 years of mobile experience, from native code to cross-platform Flutter apps. Has shipped consumer apps to the App Store and Google Play, built one design system that runs across mobile and the web, and led mobile teams on several products. Gets involved early: works with designers and managers to settle how a screen should behave before it is built.

### EXPERIENCE

#### Gameram

Sep 2023 — Present

##### Software Engineer

Remote · Cyprus

- Built the mobile app of a social network for gamers, where people share what they play and find others to play with.
- Platform metrics published on the company website: **5.6M+** gamers connected, **7M+** posts, **12M+** app installs.
- Shipped to the **App Store** and **Google Play**.
- Flutter, BLoC, REST and Hive; contributed to the shared design system.

#### NDA (confidential project)

Oct 2025 — Apr 2026

##### Software Engineer · parallel contract

- Flutter client with a local-first data layer on Drift and Riverpod, connected to a blockchain backend.

#### Finblox

Nov 2021 — Aug 2023

##### Software Engineer

Remote · Singapore

- Built **Finblox Mobile Wallet** for iOS and Android from the first commit.
- Extended the same codebase to the web with Flutter, so one design system covers three platforms.

#### CoinsBank

Dec 2017 — Nov 2021

##### Team Lead · Software Engineer

Remote · Spain

- Led the mobile side of three products over four years.
- **CoinsBank Mobile Wallet** — an all-in-one gateway to blockchain services, built from scratch for iOS.
- **Blockchain Cruise 2019** — companion app for a conference held on a ship.
- **Neocard** — mobile banking for iOS and Android on a single Flutter codebase.

### SKILLS

#### Languages

Dart · Swift · Objective-C · Python

#### Frameworks

Flutter · SwiftUI · UIKit · Combine · Swift Concurrency · Reactive Programming

#### Architecture

BLoC · Riverpod · MVVM · VIPER · Clean Architecture

#### Data

Drift · Hive · SQLite · CoreData · REST · GraphQL

#### Tooling

Git · Bitrise · Fastlane · Firebase · Crowdin · Mason · Swift Package Manager · JIRA · App Store Connect

#### AI-assisted development

Claude Code · coding agents · spec-driven development

### EDUCATION

#### Ural Federal University

Software, computer technology and automated systems

2006 — 2010

Degree recognised by Anabin (KMK).

## Soft Media Lab

Apr 2016 — Feb 2017

### Senior iOS Developer · Team Lead

Yekaterinburg, Russia

- **Avatar** — location-based private messaging between nearby strangers: geo search, REST backend, Realm, push notifications, in-app purchases, messaging and file sharing.
- **Creditclub** — credit system built on RxSwift and MVVM.

## NET Element

Feb 2015 — Apr 2016

### iOS Engineer

Yekaterinburg, Russia

- **Aptito** — all-in-one restaurant POS. Kept the live system running while adding features, tracked down memory leaks in a large legacy codebase, and wrapped printer and barcode-scanner SDKs into usable modules.
- **UBRA Boats** — two apps (riders and skippers) on VIPER.

## East Media

Oct 2011 — Feb 2015

### iOS Developer

Yekaterinburg, Russia

- **PinMe** (Pinterest-style app), **Live Poetry** (interactive multimedia book), and digital editions for the *Uralskiy Rabochiy* newspaper.
- Built out core skills in networking, multithreading, UI performance and animation.
